

CUSTOMERS

All products supplied by Flow Dry are manufactured from synthetic or manufactured materials and do not contain any raw materials produced from, or substances derived from animal origin (i.e. animal parts, tissues, or body fluids) and hence may be designated 'animal derived component free' (ADCF) under many customer classification systems.

Flow Dry, and its global companies, offers a diverse portfolio of products which are manufactured with inputs provided by many suppliers, all of which make up Flow Dry's global supply chain. At Flow Dry, we strive to act in an environmentally and socially responsible manner, in compliance with applicable laws, while meeting the needs of our customers and shareholders.

Flow Dry is committed to avoiding the use of BSE (Bovine Spongiform Encephalopathy) / TSE (Transmittable Spongiform Encephalopathy) materials in its products. While Flow Dry does not have complete visibility into the sources of all component materials, we actively engage with our suppliers to promote responsible sourcing practices.

SUPPLIERS

Where possible, Flow Dry will incorporate the principles of responsible sourcing of BSE / TSE into our contract terms with suppliers and will work with our suppliers to create awareness of these issues within our supply base. We will make our position statement available to our suppliers and expect them to adopt similar positions or policies with respect to their own supply chains.

Flow Dry encourages its suppliers (and their sub-suppliers) to support industry efforts and exercise due diligence on their sourcing to avoid use of BSE / TSE materials in components or products they supply to us.
